

VAILOG completes a new cross-dock distribution centre for GEODIS (20,300 m²) in Paris

VAILOG successfully completed a new cross-dock distribution platform in the Port of Paris (Bonneuil-sur-Marne), just 12 km from Paris' first ring-road. The new distribution platform is entirely leased to GEODIS BM.

With this new construction, VAILOG reaches 100,000 m² of new distribution spaces built for the SNCF GEODIS Group in Europe.

With a total G.L.A. of 20,300 m², the distribution centre allows multi-modal transportation: road, rail and fluvial.

It benefits from a 300 m long truck court and 600 m of rail dock.

VAILOG was assisted by VIRTUO INDUSTRIAL PROPERTY, specialized in warehouse development management, and by CBRE who acted as real estate agent in the transaction.
