

## Record-time construction in Bologna for Norbert Dentressangle's new Distribution Centre (20,500 m<sup>2</sup>)

April 2007

Vailog completed the first phase (10,400 m<sup>2</sup>) of Norbert Dentressangle's new distribution centre in Interporto di Bologna (Italy). **Construction was completed in a record-time of just 4 ½ months.** At final completion, the new Vailog Bologna 3 distribution centre will have a surface of 20,500 m<sup>2</sup>.

Building specifications include a clear storage height of 12.40m, NFPA sprinkler system, high quality environmental solutions, such as solar panels, high level of natural lighting and the implementation of low pollution construction processes.

It is Vailog's third development in Interporto di Bologna, where it also developed the Indesit DC (49,000 m<sup>2</sup>) and is about to complete the construction of DHL Express's main Italian hub (11,700 m<sup>2</sup>).
