

Vailog signs a new lease with Geodis in Castel San Giovanni (Milan South) 32,000 m²

Vailog starts the construction of a new distribution center of 32,000 m² in CSG Logistics Park. The new distribution center will be completed in September 2011 and will be entirely leased to **Geodis Logistics**.

The new warehouse will be equipped with a 1.5 MW solar panel installation, producing over 1,700,000 kWh per year. It will be developed with the most advanced environmental features (isolation, rain-water recycling, etc.) and will be carbon-neutral. This will allow Vailog to seek a "Very Good" certification by **BREEAM** standards.

CSG Logistics Park is Northern Italy's most successful logistics park. By the end of 2011 it will reach over 350,000 m² of distribution, entirely occupied. Ideally located on the A21 motorway, it combines direct motorway access, rail connection, integrated maintenance services and high security standards. Current occupiers include Geodis, Giochi Preziosi, Rajapack, Norbert Dentressangle, Moncler, Bosch, DSV, etc.

"**Geodis** is continuing its expansion in the market of contract logistics in Italy, and reinforces its presence within CSG Logistics Park, one of Italy's best performing logistics parks. This new facility also strengthens Geodis' commitment to operate environmental friendly warehouses in support of its commercial development", says **Stephane Cassagne**, Head of legal affairs, insurance and real estate of Geodis Group.
