

## Vailog starts new construction 40,000 m<sup>2</sup> in Piacenza (Italy)

Vailog started the construction of a new warehouse in the **Piacenza Logistics Park**, Italy.

After the successful development of the first two phases of the Piacenza Logistics Park (54,000 m<sup>2</sup>, operated by COIN-UPIM and 8,300 m<sup>2</sup> operated by Amada), Vailog commenced the construction of the third building (40,000 m<sup>2</sup>), which shall be available for leasing in the second quarter of 2011.

The Piacenza Logistics Park is strategically located in Pontenure, just South of Piacenza and 50 km from Milan, alongside the A1 motorway and 5 km from the closest motorway exit ("Piacenza Sud").

The facilities are designed to the highest environmental credentials and will benefit from the highest environmental certification for industrial buildings.

The energetic sustainability is enhanced by a photovoltaic facility, providing an installed capacity exceeding 1.87 MWp and producing close to 2 million kWh per year (the equivalent of 600 households).

At completion, the Piacenza Logistics Park will develop a total of 120,000 m<sup>2</sup> of distribution space.
